Exclusive In-House Fire Systems Design

Total Safety utilizes our own in-house design capabilities, which results in start-to-finish ability and accountability when it comes to fire systems:

- Management
- Design
- Procurement
- Installation
- Testing
- Commissioning
- Servicing
- Training

This allows you to take advantage of our global, unparalleled inspection and maintenance solutions, while improving safety and saving money.

Talent You Can Trust

Total Safety has proven time and again to be the world's leading safety and fire services provider. Our high-performance team of qualified fire technicians is trained on virtually all major systems, brands and types of equipment. We have expert knowledge of your compliance and code requirements, including those from the NFPA, USCG, ABS and other regulatory authorities.

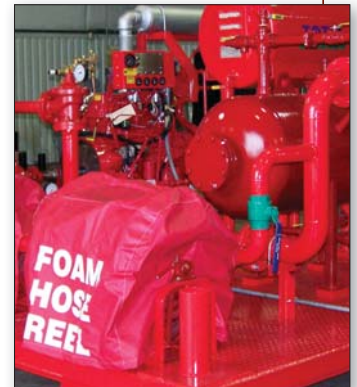

Flexible, Dependable Support

Total Safety assumes the responsibility of maintenance functions and compliance inspections for your fire systems and equipment, freeing up resources at your location and adding third-party certifications. This allows you to:

- Invest internal resources on revenue-producing activities
- Reduce overall cost of fire inspection and documentation
- Slash non-compliance risk issues
- Improve overall safety by trained fire professionals

In-Plant Service Centers (IPSCs)

Whether your needs are onshore or offshore, Total Safety's certified, licensed technicians can meet all of your fire service needs at your location with an In-Plant Service Center (IPSC). Our exclusive on-site IPSCs are equipped with state-of-the-art equipment to ensure work is performed professionally and safely and is delivered on time and on budget.

See what a difference the Best Minds in the Business can make to your safety, operational and financial performance. Our mission is to ensure the safe Wellbeing of Workers Worldwide (W³).
