

TURNAROUND SERVICES

Need Reliable, Responsible Turnaround Solutions? Call the Best Minds in the Business!

Only Total Safety has the people, programs and processes to provide you with the safety support you need during crucial turnaround and shutdown periods.

Minimize Costs by Maximizing Safety

Total Safety has the experience you can trust. With experience in over 500 plant turnarounds since 2005, and 150 in 2007 alone, we've developed a menu of proven turnaround services that can improve safety, decrease turnaround periods and lower costs at any plant location.

Our expert turnaround services include:

- Rental equipment for respiratory protection, gas detection, fall protection, personal protection, confined space entry and communications
- Grade D breathing air services
- Trained on-site technicians to support maintenance, calibration, cleaning and tracking of equipment
- Respiratory fit testing
- Safety supplies (PPE)
- Safety attendants – confined space/bottlewatch/rescue technicians/safety technicians
- Scheduling of people and resources
- Archived database of activity, cost and equipment
- Turnaround best practices

By using Total Safety's expert services during your turnarounds, you can:

- Improve safety compliance, quality control and accountability
- Have around-the-clock access to equipment and trained personnel
- Achieve maximum asset utilization
- Reduce initial capital investment
- Reduce administrative burden

The Best Minds in the Business!

TOTAL TURNAROUND

Total Safety's turnaround service solutions provide:

- Improved safety compliance, control and accountability
- Maximum asset utilization with minimum up-front capital investment
- Equipment rental cost savings

Improved Safety, Compliance, Control and Accountability

Well in advance of your turnaround, Total Safety's experts partner with your management team to plan for anticipated safety needs. We have created "playbooks" of best practices, collaborated from over 500 turnarounds, that we use to audit current safety performance, identify existing issues and create a game plan to decrease the turnaround period and increase efficiency.

We work with you throughout the turnaround process to ensure that everything operates in accordance with these practices in regard to:

- Inventory and industrial planning
- Contractor-level rental and services cost reporting
- Daily safety incidence reporting

Protect Your Staff and the Bottom Line

You may think you have only two options when it comes to furnishing your turnaround staff with necessary safety equipment. You can purchase the additional equipment upfront or allow contractors to lease their own equipment and pass the cost on to you. In either case, your plant runs the risk of losing money in the end. Further losses can be incurred when plants lack the resources to track the equipment being used by hundreds, if not thousands, of contract workers.

We give you the power to maximize asset utilization while minimizing up-front capital costs. With Total Safety, you can:

- Centralize equipment rental by setting up an on-site In-Plant Service Center (IPSC)
- Let us maintain, distribute and track your existing equipment

Whatever your need, Total Safety ensures that your staff – and your bottom line – are well protected.

Now's the Time to Tap the Best Minds in the Business

When you call on Total Safety to assist you with your plant turnarounds, you have the peace of mind of knowing that experience and reliability are on your side. We make sure that your entire turnaround staff is fully equipped with the safety equipment they need to get the job done and that your plant is saving time and money in the process.
