

Building HEROES. Protecting HEROES.

Building HEROES. Protecting HEROES.

At Total Safety®, we take personal safety seriously. We know that we are the face of safety that our customers see each day at work. In the simple act of doing our jobs, we bring peace of mind to our customers knowing their employees are in the hands of safety experts.

Whether we are providing respiratory, gas detection or communication solutions, auditing a facility, designing a fire suppression system, rescuing people from a dangerous situation, or teaching employees how to protect themselves and their co-workers, we are there to put our customers at ease so they can focus on their business.

Celebrating Safety HEROES

We are on a hero's journey to make the world a safer place for workers; and we are extremely proud of the millions of man hours that we have logged keeping our customers and their contractors safe. Ensuring the safe Wellbeing of Workers Worldwide (W³) is our heritage. We are proud to carry on this tradition at Total Safety and in our personal lives. It is not a shield or logo that makes the Total Safety brand; it is our people.

Early this year we adopted the acronym **HEROES – Helping Everyone Reach Operational Efficiency Safety** – to remind every single person at Total Safety and at the facilities we serve about this shared mission. Wherever our clients encounter safety, health and environmental challenges we are there and ready to help.
